Filed: January 24, 2006
Title: MOBILE COMMUNICATION METHOD, MOBILE COMMUNICATION
APPARATUS, HOME AGENT APPARATUS, ACCESS ROUTER
INFORMATION SERVER APPARATUS, AND MOBILE COMMUNICATION
SYSTEM
T.C./A.U.: 2463
Examiner: Mohammad S. Anwar
Confirmation No.: 7945
Docket No.: MAT-8809US

INTERVIEW SUMMARY

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicants representatives were contacted by the Examiner on September 28, 2010 to discuss claim 1 and the remarks filed on September 20, 2010. Applicants representatives clarified that Takusagawa, Dommety and Funato suggest conventional Fast Mobile IP compatible and non-compatible systems. Applicants representatives also clarified that neither of the references, however, suggest a mobile apparatus having the ability to a) determine whether the access router is compatible with Fast mobile IP, or b) control the access router and/or home agent based on this determination.

The Examiner could not find this feature in the references, but stated that he would have to take a closer look. The Examiner also stated that if he could not find the determining feature in Applicants' claim 1, that a further search would be necessary. No agreement was reached.

Respectfully submitted,

Jacques L. Etkowicz, Reg. No. 41,738
Attorney for Applicants
